Few Shot Talking Heads

Description

This project is a PyTorch implementation of [Few-Shot Adversarial Learning of Realistic Neural Talking Head Models](#). In this paper, a GAN has been designed and trained to generate realistic talking head models from a only a few head-shots (potentially just one) and the face landmarks to reproduce.

The paper explains the architecture of the model, but a lot of details are missing, and no official implementations or trained models have been released. Therefore, we are trying to recreate the model as best as we can, and to explain the missing details here. **We need your help in order to finish this, please, contribute!**

Discussion

한계점 & 추후 발전 방향

Limitation

1. 뼈대가 제대로 되지 않으면 제대로 생성되지 않는다.

2. Base Code가 미완성 상태라 개발에 오래 걸림

Talking Heads

Description

This project is a PyTorch implementation of [Few-Shot Adversarial Learning of Realistic Neural Talking Head Models](#). In this paper, a GAN has been designed and trained to generate realistic talking head models from a only a few head-shots (potentially just one) and the face landmarks to reproduce.

The paper explains the architecture of the model, but a lot of details are missing, and no official implementations or trained models have been released. Therefore, we are trying to recreate the model as best as we can, and to explain the missing details here. **We need your help in order to finish this, please, contribute!**

3. 부족한 컴퓨팅 환경...

DEV. Possibility

메신저 (ex. Line, Kakaotalk)

- 본인의 사진으로 표정 GIF 만들기
- 이모티콘 대신 사용가능!

마이클 잭슨이 다시 춤을 춘다면?

- 다시 한 번 빌리진을 추는 모습 재현 가능
- 더 나아가 마이클 잭슨이 TT를 출 수 있음

얼굴 랜드마크를 바탕으로 한 명언 뿐만 아니라
몸으로 하는 것 등 다른 것들도 생성 가능

Voice gan과 연동하여, 목소리를 생성하고 말하는 영상에 합성

As soon as you trust yourself, you will know how to live.

TobigSay

별일없이 사는 25살.

국민대에서 빅데이터 경영통계라는 3가지 전공이 합쳐진 키메라학과에서 4학년 재학중입니다.

A/B 테스트 검증 중독자입니다.

투빅스 면접에서 감명 깊게 읽은 책이 무엇이냐는 질문을 받고 <빅데이터는 거품이다>라고 답해서 떨어질 줄 알았지만 결국 합격해서 1년간 즐거운 활동을 하였습니다.

좋아하는 영화로는 <A.I.>나 <혹성탈출>같은 디스토피아 SF영화, <싱 스트리트>같은 음악영화, <미스 리틀 선사인> 같은 B급 감성 영화를 좋아하는 '영화충'입니다.

이 쪽 분야가 적성에 맞는 거 같지만 저녁이 있는 삶을 꿈꾸기에 진로를 많이 고민하고 있습니다.

언젠가 완성하고 싶은 프로젝트로는

1. 음악을 악보화 해주는 딥러닝
2. 누구나 진짜 사람이라고 믿을 GAN으로 만드는 Fake SNS 인플루언서 1만 팔로워 달성
3. 젠트리피케이션 문제를 예측하고 해결하는데 소상공인에게 도움을 줄 수 있는 분석과제.
4. 실종아동의 현재 몽타주 생성 딥러닝
5. 여행가서 모르는 사람한테 사진 부탁 하지 않아도 되는 "알리바이 사진" 생성
6. 음치 맞춤 노래방 반주 키 조절

하고 싶은 게 너무나 많지만 능력이 부족하니 도와줘요~~
